

➔ Copenhagen  
Airport

Dan.Sig

DanSign has been a consultant on wayfinding and signage projects at Copenhagen Airport since 1982.

Both outside and in, the signs maintain the airport's graphic identity, created by Designlab.

DanSign's LockSign system is used for all static signs. The CurveSign system is used in all the office buildings.

In 1990, Copenhagen Airport received an IG Award for its signage. The award was given for the well-thought-out design, which, in its visual expression, provides clear visibility and easy interpretation for passengers while at the same time blends with the buildings with due consideration for the airport's high aesthetic demands.
