

➔ Wayfinding Shopping centre

Creative wayfinding concepts tailor-made for individual needs

Dan.Sigro

DanSign's consultants and design team are specialists at designing wayfinding solutions for buildings in which particularly high demands are made on leading people from A to B in the most effective and expedient way.

Shopping centres, airports, culture centres and sports arenas are just a few examples of buildings where signposting is not only part of the decoration but must also meet the logistical requirements of leading people to where they want to go.

DanSign has supplied wayfinding concepts, including tailor-made pylons and illuminated/non-illuminated direction signs, for the shopping centres Fields, Fisketorvet, Lyngby Storcenter and Bruun's as well as Copenhagen Airport and many others.

The pylons' graphic ornamentation is replaceable, ensuring maximum flexibility.
